Volunteers will work to maintain and improve natural areas while providing opportunities to learn about habitat and wildlife in our neighborhood park.

**WHERE:**
- **Wave Meadows** which will have a diverse selection of flowering native perennials and habitat for pollinators, insects, and birds.
- **Rain Gardens** which collect water to reduce runoff and water pollutants while providing food and shelter for pollinators, songbirds and other wildlife.
- **Trees** along the north and west edges of the park that provide shade and habitat for wildlife.

**WHAT:** Volunteers will work to remove invasive and noxious weeds and replant the **wave meadows** with native plants appropriate to the conditions. The **rain gardens** on the north and west end of the park will be improved by removing blackberries and replacing them with native shrubs and perennials. The dead and missing **trees** will be replaced with appropriate native trees such as Douglas and vine maple, cascara, hawthorn, Oregon ash and Garry oak.

**HOW:**

**WHO:** A group of Maple Leaf residents who care about Maple Leaf Reservoir Park.

**WHAT:** Volunteers will work to maintain and improve natural areas while providing opportunities to learn about habitat and wildlife in our neighborhood park.

**WHEN:** TBD, as soon as volunteer work parties are allowed by Seattle Parks.

**YOU CAN HELP:**
To help fund this community led effort or to get involved as a volunteer please see the Seattle Parks Foundation’s website: [https://www.seattleparksfoundation.org/project/friends-of-maple-leaf-park/](https://www.seattleparksfoundation.org/project/friends-of-maple-leaf-park/)
